EDUCATION & RESEARCH

Australian National University

2025.12 - Present **Visiting PhD student** Supervised by Daniel Noble
Project: Thermal plasticity of avian embryonic development

Beijing Forestry University

2021.09 - Present **PhD** Supervised by Jianqiang Li & Jiliang Xu
Project: Temperature-driven reproductive strategies, embryonic development, and adaptive evolution in uniparentally and biparentally incubating birds

2017.09 – 2021.06 **Master** Supervised by Jianqiang Li
Project: A comparative study of different incubation modes and their adaptability of two *Aegithalos* species

2013.09 – 2017.06 **Bachelor** Supervised by Gangming Zhang
Project: Phylogenetic analysis of the Asian “*Cheilanthes*” — Based on two nuclear DNA sequences

RESEARCH FOCUS

- **Avian Reproduction & Parental Care**

Studying how birds regulate reproduction through reproductive strategies, parental investment, and incubation behaviour, and how environmental conditions shape parental care strategies.

- **Incubation Behaviour & Thermal Ecology**

Studying how birds regulate the thermal environment of developing embryos through incubation behaviour, and how temperature influences incubation investment, incubation strategies, and reproduction.

- **Embryonic Development & Developmental Plasticity**

Studying how temperature and other early-life environmental conditions shape embryonic development, phenotypes, and survival, and how developmental responses contribute to adaptation to environmental change.

- **Comparative Physiology & Evolutionary Ecology**

Using comparative and evolutionary approaches to investigate how physiological and behavioural responses to environmental variation are shaped by reproductive strategies, ecological conditions, and evolutionary history.

SKILLS

- **Field and lab skills:** Nest searching & monitoring; Breeding behaviour monitoring; Bird banding; Wildlife photography; PCR; Embryonic heart-rate monitoring (Buddy); Songbird blood sampling for hormone analysis.
- **Computer skills:** Windows; R (*lme4*, *MuMIn*, *RMark*, *MCMCglmm*, *ggplot2*, *metafor*, *orchaRd*, etc.); SPSS; Microsoft Office; Adobe Creative Suite (Photoshop, Illustrator, Premiere).
- **Language:** Mandarin; English.

HONORS & SCHOLARSHIPS & GRANTS

2026	Travel grant for graduate students of Beijing Forestry University attending academic conferences, ¥22000.
2024	One-year Visiting PhD Scholarship from the China Scholarship Council (CSC), ¥120000.
2022	Outstanding Student Cadre (Beijing Forestry University).
2021	Excellent master thesis (Beijing Forestry University).
2017	Excellent bachelor thesis (Beijing Forestry University).
2016	National Encouragement Scholarship, China, ¥5000.
2015	Outstanding Student Cadre (Beijing Forestry University).

PRESENTATIONS & POSTERS

2026	Presentation	Parental care and bird embryonic metabolism: a comparison between uniparentally incubating Silver-throated Tits and biparentally incubating Black-throated Tits	20th International Society for Behavioral Ecology Congress	Turin, Italy
2023	Presentation	A comparative study on different incubation patterns and adaptability of two <i>Aegithalos</i> species	The 8th China Forestry Academic Conference	Harbin, China
2022	Presentation	The effect of ambient temperature changes on incubation strategies in two bird species with different incubation modes	The 16th Kingfisher Forum	Online
2021	Poster	The variation of eggshell patterns in two	2021 Beijing Zoological	Beijing,

		<i>Aegithalidae</i> species	Society Academic Symposium	China
2019	Poster	Nest visit frequency by research does not affect the nesting success of two domed-nest birds	The 15th China Ornithological Congress	Changchun , China
2019	Presentation	Does research activity affect nest survival of birds? A case study on two <i>Aegithalidae</i> species	2019 Beijing Zoological Society Academic Symposium	Beijing, China
